■■ Strict Outdoor Weather & Safety Guardrails

Electronic table components and high-grade event felts are highly vulnerable to environmental factors. We will not set up outdoors in rainy conditions, or perform any outdoor events when local temperatures fall **below 48°F (9°C)** or climb **above 90°F in direct sunlight**. Electronics will fail and suffer permanent damage under extreme temperatures. You must ensure your game tables are fully sheltered under standard patio coverage, awnings, or canopies if you choose to host your party layout outdoors.

■ Our Pristine Quality Guarantee

Casino table structures, colors, and styling accents may vary due to clean maintenance, normal wear and tear, or active inventory rotations. We dedicate painstaking effort every single week to patch, clean, and fix any table wear immediately following a venue rental. To guarantee your private corporate event or home party always features crisp, luxurious gear, **we buy completely new casino tables every three months** to retire heavily used inventory.
